

Head of Product Engineering & Development

Functional Group: Product Engineering
Reporting to: Chief Investment Officer
Campus Location: Stamford, CT
Compensation structure: Salary plus discretionary bonus

Who We Are

Almas is an investment technology and management firm focused on the utilization of advanced analytical methodologies and technologies to deliver innovative investment returns to its clients. In order to keep ahead of the market, we continue to seek best-in-class talent across all disciplines for our main campus in Stamford CT and our forthcoming offices in Bahrain, Dublin and Singapore.

Role Description

Reporting to our CIO, the Product Engineering & Development (PED) team is responsible for designing our investment offerings for our investor base. Working closely with our relationship managers in the field within our various markets, this team works to understand emerging demand for product and portfolio solutions. With these insights, the PE team collaborates with our counterparties to engineer unique and cost-effective solutions to deliver Almas's core alpha products to our clients.

As we continue to build out the Almas platform, we are searching for a Head of Product Engineering to spearhead our PED efforts. In this role, we are looking for a highly quantitative innovator with a track record of success in structuring complex investment products.

Responsibilities

- Lead our market research efforts to understand client demand
- Coordinate with internal Alpha Research and Risk and Quantitative Method teams to design and price efficient and tailored structured products
- Design and employ advanced stress test reporting to convey possible performance outcomes to our clients

Required Skills & Experience

- Undergraduate or advanced degree within a technical discipline
- 7+ years of industry experience, with 3+ years in structured products
- Deep knowledge of derivatives and hedging methodologies
- Advanced modelling and data manipulation expertise
- Strong interpersonal and communication skills
- Unquestionable integrity
- Knowledge of relevant US and European regulations, including UCITS and AIFMD

Method of Application: Send resumes to careers@almascapital.com
