

Lead Technical Project Manager

Functional Group: Technical Product Development
Reporting to: Chief Digital Officer
Campus Location: Stamford, CT
Compensation structure: Salary plus discretionary bonus

Who We Are:

Almas is an investment technology and management firm focused on the utilization of advanced analytical methodologies and technologies to deliver innovative investment returns to its clients. In order to keep ahead of the market, we continue to seek best-in-class talent across all disciplines for our main campus in Stamford CT and our forthcoming offices in Bahrain, Dublin and Singapore.

Role Description:

This team will be tasked with managing the development of the Almas Nexus independent broker investment and analytics dashboard. This cutting-edge system will unify the many needs of international brokers into a single system to improve their ability to service existing clients and manage firms more efficiently.

Reporting to our CDO, the Lead Technical Project Manager will be directly responsible for managing 2-3 team members and several outside contractors. The Project Manager will direct the timelines and individual tasks need to complete the dashboard, and later new feature rollouts, in a timely manner. The Project Manager will be the main link between the product development and other departments helping to implement feedback and new features into the product.

Responsibilities:

- Oversee initial product and new feature development and rollouts
- Manage outside contractors working on system or providing integrations
- Work with tech support staff to resolve system bugs in a timely manner
- Work with internal sales, marketing and other staff members to plan and innovate new feature possibilities
- Assist the Chief Development Officer in the day to day operations of the product management and development department

Required Skills & Experience:

- 5+ Years in technical project management (Agile Development Preferred)
- Experience implementing SAAS application feature roll-outs
- Experience working with API's and system integrations
- JIRA implementation and scrum master experience
- Background in financial software a plus
- Prior coding/development background a plus
- Strong interpersonal and communication skills required
- Second languages preferred (French, German, Arabic, Mandarin)

Method of Application: Send resumes to careers@almascapital.com
